

Measuring Guidelines for Roller Blinds

Inside Mount

Blind fitting into a window reveal to sit flush with the front of the reveal. The minimum depth of the reveal for Inside Mount is 70mm.

Width

Measure internal width of the reveal. Measure at three points: top, middle and base of reveal. The smallest measurement is used.

Top:

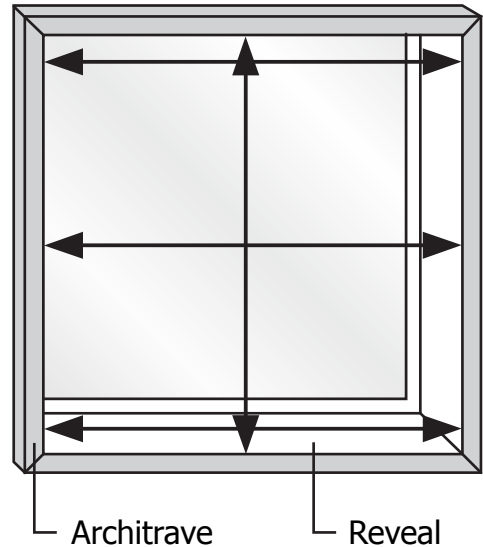

Middle:

Base:

Height

Measure internal height of the reveal.

Height:

Please supply a photo of the window when possible.

Note: Inside mount blinds will leave a light gap on each side of the blind.

Outside Mount

Blind fitting onto the architrave.

Width

Measure from outside edge to outside edge of architrave at three points: top, middle and base of reveal. The largest measurement is used.

Top:

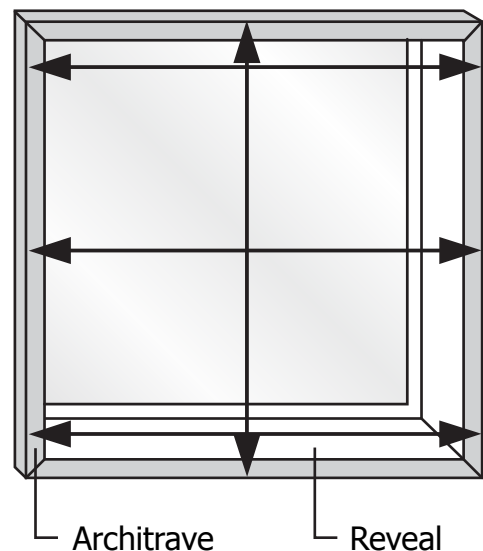

Middle:

Base:

Height

Measure from outside edge to outside edge of architrave.

Height:

Please supply a photo of the window when possible.

Note: Some architrave is visible on each side of the blind.
